

Toyota Forklift Parts

Toyota Forklift Parts - In the U.S., Toyota Materials Handling inc., or TMHU, continues to be the top selling lift truck supplier since 1992. This company has been headquartered out of Irvine, California for well over 40 years, offering a complete line of quality lift trucks. With a distinguished reputation of stability and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the cornerstone of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S. are manufactured here.

All Toyota machinery and components manufactured within North America adhere to the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its commitment to constant development, and its environmental systems. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift vehicles emit 70% less smog forming emissions than the existing centralized EPA standards and have complied with California's strict emission standards and regulations.

Toyota Material Handling, U.S.A. - The Industry Leader

Brett Wood, President of TMHU, links Toyota's achievement to its stout commitment to constructing the best quality lift trucks while delivering the utmost customer service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, also referred to as TICO, is listed in Fortune Magazine as the world's largest lift truck supplier and is among the magazines celebrated World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not many other companies and no other lift truck maker can match Toyota's history of caring for the environment while concurrently encouraging the economy. Environmental responsibility is an important aspect of company decision making at Toyota and they are proud to be the first and only producer to offer UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet an added reason they remain a leader within the industry.

Toyota originally introduced the 8-Series line of lift trucks in 2006, again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission standards, and California's more environmentally friendly emission standards. The end creation is a lift vehicle that produces 70 percent less smog forming emissions than the current Federal standards allow.

Furthermore in 2006, Toyota developed a relationship with the Arbor Day Foundation, furthering their dedication to the environment. In excess of 57,000 trees have been planted in local parks and national forests damaged by natural reasons such as fires, as a product of this relationship. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's system of dealers to non-profit organizations and neighborhood consumers to help sustain communities all over the United States

Toyota's lift trucks offer superior strength, visibility, efficiency, ergonomics, and all the foremost safety equipment that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS"•, helps reduce the chance of mishaps and accidental injuries, and increasing productivity levels while minimizing the potential for merchandise and equipment damage.

System Active Stability senses several conditions that could lead to lateral insecurity and potential lateral overturn. When one of those factors are detected, SAS immediately engages the Swing Lock Cylinder to steady the rear axle. This changes the lift truck's stability trajectory from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the likelihood of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding strength.

SAS was initially released to the market on the 7-Series internal combustion models in 1999 and subsequently catapulted Toyota into the industry leader for safety. Ever since then, SAS have been built-in to the majority of Toyota's internal combustion machines. It is standard gear on the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with obligatory operator instruction, overturn fatalities across all brands have decreased by 13.6% since 1999. Additionally, there has been an overall 35.5% reduction in industry wide collisions, loss of control, falls and tip overs from a lift truck for the same period.

Toyota's measure of brilliance reaches far beyond its technological achievements. The company maintains an extensive Operator Safety Training curriculum to help consumers meet OSHA standard 1910.178. Education services, video tutorials and various resources, covering a broad scope of matters-from personal safety, to OSHA rules, to surface and cargo conditions, are available through the dealer network.

Toyota has maintained a permanent existence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, produced its 350,000th lift vehicle. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in America at the moment are built in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of land. Facilities include a National Customer Center, as well as production operations and distribution centers for equipment and service components, with the entire commitment exceeding \$113 million dollars.

The modern NCC was built to operate for TMHU clients and dealers. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live product demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its founder, Sakichi Toyoda, in 1867, and finally a training center.

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations all through the United States, providing the most comprehensive and inclusive client support and customer service in the industry. The company's new and Licensed Used lift vehicles, service, components, and financing features make Toyota dealerships a one-stop shop to ensure overall client satisfaction.
